Harman - Does this mean that CalPERS should only be paying a pension based on 1/2 of Harman's salary???

The Agency contracted with CalPERS for safety, but

excluded miscellaneous employees. OAS identified that the General Manager/Chief of Police was enrolled as a safety employee. However, the duty statement for the General Manager/Chief of Police position indicated the individual may provide services as a miscellaneous member. Although the duty statement required the position to be a sworn police officer, certain duties appear to be unrelated to police safety services. For example, the duty statement indicated oversight over several other departments including: Solid Waste Handling and Disposal, and Park and Recreational Services. OAS was unable to determine whether all compensation earnable should be reported under the police safety classification. The Agency should work with EAMD to determine the appropriate enrollment and reporting of this position.
